

Torrance Refinery Fact Sheet

Background

- Operations began in 1929
- On July 1, 2016, Torrance Refining Company LLC took control of the Refinery from ExxonMobil Oil Corporation
- Facility covers 750 acres
- Employs 584 employees and 325 contractors
- Employs thousands of California contractors during major maintenance periods known as Turnarounds
- Refines approximately 155,000 barrels of crude oil per day producing about 1.8 billion gallons of gasoline per year

Distribution

- Produces 20% of gasoline demand in Southern California, 10% of gasoline demand in the entire state
- Refines gasoline for Nevada and Arizona
- Crude transported to the refinery via pipeline from San Joaquin Valley and Port of Los Angeles
- Liquefied petroleum gas, sulfur, and asphalt blendstocks are primarily distributed by tanker truck and railcar
- Gasoline, marine and jet fuels are distributed via pipeline

Safety and Environment

- Fully-equipped fire department with experienced personnel who regularly train with Torrance Fire Department
- Refinery fire brigade includes professional Fire Fighters, Rescue Specialists, Emergency Medical Technicians, and Hazardous Materials Technicians and Specialists
- Reclaimed water facility treats and reuses water onsite that would otherwise be discharged to the ocean
- Refinery voluntarily accepts and manages the city's overflow storm water during heavy rain to prevent flooding in the city
- Waste management program facilitates reuse, recycling and regeneration
- 24-Hour Neighborhood Hotline (310) 505-3158 responds to neighbors' questions and concerns

Annual Economic Impact (JULY 2016–JULY 2017)

- \$8.7 million in Property Taxes paid to Los Angeles County
